

INTRODUCING COLEX INTERNATIONAL PROTECTAFLEX

THE NEXT GENERATION DUAL CONTAINMENT SYSTEM

Please find images attached

Colex International Protectaflex is the next generation dual containment hose system, offering all the benefits of existing products but in a smaller, lighter, and more manageable format.

Due to its lighter weight, and reduced packaging, Protectaflex offers a significant reduction in shipping weight, therefore lowering your carbon footprint.

The durable PU outer is UV stable and offers excellent clarity for visual inspection.

Inner hoses are available in Reinforced PVC, Vendhose and NeuVend making Protectaflex perfect for a wide range of applications in many different market sectors:

- Water treatment and transfer
- Chemical dosing
- Food and Beverage
- Oil and Gas
- Pharmaceutical

Both Vend Hose and NeuVend have achieved WRAS approval for the conveyance of hot and cold potable water.

Key benefits of Protectaflex:

- High burst pressure.
- Lower cost. Up to 60% cheaper than Draw-Flex, Hose in Hose Dual Containment.
- Lower shipping and storage costs. Up to 48% lighter than Draw-Flex, Hose in Hose Dual Containment.
- Better flexibility & lower bend radius.
- Easier to handle & easier to install than current dual contained product.
- Reduced packaging and fully recyclable resulting in a lower carbon foot-print.
- Fittings can be swaged on, offering a comprehensive coupling, eliminating the risks of clips and the need for expensive bespoke dual contained fittings. Only one standard hose tail fitting required per end.
- System designed catch-pots which enable the outer containment to be terminated inside the catch-pot.
- Potential to have a continuous run of inner dosing hose even with a catch-pot.

Ends

About Colex International Ltd.

Colex International Limited have been manufacturing and selling high quality hose and tube throughout the world since 1992.

The first coil of nylon tube came off the production line in February 1992 and Colex has expanded into many new and more diverse products since. These include PVC hose and tube, Suction and Discharge hose and more customized products such as Precision PU sleeving for offshore and defence related industries and WRAS approved hoses and liners.

Colex International now offers an extensive range of stock products and specialises in manufacturing custom products that meet customer's specific requirements.

This coupled with a hardworking staff and an unrivalled number of years' experience within the industry, enable Colex International to provide the high levels of service and quality products that modern buyers and distributors expect.
