

Colex International Limited

Manufacturer of flexible thermoplastic hose & tube

Colex can supply hose & tube in the following materials:
PVC, Nylon, Polyurethane, Polyethylene, Silicone, PTFE, FEP & DIN Spec Nylon.
Custom fabrication is also available.

It was an exciting moment when Colex completed manufacturing Northern Pumps' first order of Protectaflex, with this particular consignment being supplied by them to Yorkshire Water for use in one of their water treatment facilities.

The large drums of WRAS approved Vendhose were fed onto the line, for final processing.

Covered with a durable UV stable PU outer and offering excellent clarity for visual inspection, Protectaflex is the next generation dual containment hose system, offering all the benefits of existing products but in a smaller, lighter, and more manageable format.

Protectaflex is the ideal solution for such an application due to its many benefits, most importantly ease of installation and reduced size and weight compared to traditional hose in hose dual containment.

This hose was manufactured in continuous lengths of over 100M, which would be far more difficult to manage in these sizes with the traditional hose in hose systems.

For more information about Protectaflex, please visit the [Protectaflex web page](#) or call 01858 461 100 to place your order today!
